

Cove Harbour Update

Legal defence is being prepared and needs to be presented in early April. Then there is a period where there is an opportunity to adjust the defence data and thereafter a date for the hearing will be set.

I had a meeting with the Council and was asked to get harbour users to provide data based on their usage and to mark on a map of the harbour to highlight the areas of the harbour they used on a regular basis. Based on the results they will see if any action can be taken. The data sheets are on the **Facebook site - Save the Fishing Boats of Cove Harbour**.
