

Cove and Altens Improvement Plan Update

Since this initiative was launched in the last edition of the Cove Chronicle there have been 10 responses received, which are in the process of being either actioned directly where they can be dealt with immediately, or added to a list of longer term improvements required.

However, this initiative will remain live and residents are encouraged to continue to submit their ideas for community improvements via the dedicated e-mail address, **improvements@cove-bay.com**

A meeting is to be held with community

groups over the next few weeks to obtain their input, but for this initiative

to be a success we need to obtain the views of individuals who have a desire to contribute to improving the area in general, be it more community facilities, additional lighting, faster broadband, path upgrades, or whatever. The Community Council needs to have your support in order to promote and advance these ideas with the relevant authorities.

A further update will be provided in the next edition of the Cove Chronicle following the forthcoming meeting with the local community groups.
