

# Hydrogen Refuelling Station Update

The second hydrogen refuelling station, ACHES (Aberdeen City Hydrogen Energy Storage), on Langdykes Road is nearing completion and will be operational early in 2017.

Health and safety procedures have been put in place and risk assessments have been carried out to ensure safety of the site. The site will accommodate cars and vans with hydrogen fuel cell capability. Use of hydrogen fuel cell vehicles will improve local air quality as no harmful particulates are emitted as with petrol and diesel vehicles, helping us work towards our aim of developing a hydrogen economy in the region.
