

## Charleston School News Continued

The fair was a great success and we made a record amount of commission allowing us to stock up on some much needed new titles for our library and reading store. Well done to both classes.

Our Primary 6 and 7 pupils entered the Intertek Science Fair competition and produced outstanding science investigation displays. The 4 entries which were judged best will be going to represent Charleston at the Primary Schools Science Fair finals held in the Natural History Centre at the end of the month. Congratulations to the children and we hope they do well at the University.

We're looking forward to our annual Health Week in June and on Friday 8 June, along with the school sports, we will be hosting an exhibition of our children's work on Science/Eco and Global links.
