

Farm Trail Project - can you help?

The Community Council is working on creating a Farm Trail to keep the

farming heritage of our community alive for future generations. There used to be several working farms and

crofts that have now disappeared with the expansion and development of housing.

While this is much needed, a small amount of funding has been bequeathed to the Community Council which is ring fenced to develop the farm trail. It is envisaged that the trail will consist of creating information and erecting cairns in identified locations across Cove and Altens.

A small working group has been established and we have lots of ideas and have gathered lots of information, however we now need to make it happen and we are looking for help with this.

Do you have project management skills and can volunteer a small amount of your time to help us move this project forward? If yes, please get in touch with Michele McPartlin, Community Council Chairperson **01224 890329** or email **info@cove-bay.com**
