

NEIGHBOURHOOD HEALTH: THE HEALTH IMPROVEMENT FUND

The Aberdeen City HSCP Health Improvement Fund is available to kick-start local initiatives to improve health and wellbeing in Aberdeen. The funding has also been extended to include Food In Focus monies to support community food work.

This year a new approach is being taken to ensure the funds reach those who stand to benefit the most, namely the people who live and work in our local communities – please see below leaflet for details.

Anyone living or working in Aberdeen can apply to the fund - including individual members of the public, staff, community groups (including informal groups), voluntary or non profit organisations - as long as the work takes place in Aberdeen.

A website to promote the funding has also been developed, under the campaign name ‘Neighbourhood Health’ -

www.neighbourhoodhealth.org.uk
with social media and YouTube videos to follow.
